

Sergey Ostaev

Automation Lead / AI Product Designer

7+ years across product logic, B2B interfaces, and automation. I design full-cycle AI-driven and enterprise products: from scenario research and CJM to high-fidelity prototypes, handoff, and adoption inside real workflows.

Ready to work from anywhere / remote / hybrid / relocation

EXPERIENCE

MAY 2023 - PRESENT

Rostelecom Information Technologies

Automation Lead / AI Product Designer

- Design architecture and interfaces for AI products and automation systems: CJM, user flows, and Figma prototypes.
- Create complex B2B interfaces: analytics dashboards, admin panels, user management, and statistics workflows.
- Coordinate a 5-person team through syncs, design reviews, delivery control, and handoff to engineering.
- Work with backend, frontend, analysts, and ML engineers to keep product logic intact during implementation.

JANUARY 2022 - JUNE 2023

X5 Tech

Project Launch Manager

- Worked with internal IT systems, business users, and requests from adjacent departments.
- Identified interface and service-process issues, highlighting bottlenecks for technical teams.
- Supported junior onboarding and documented user scenarios for internal services.

EXPERIENCE

APRIL 2019 - JANUARY 2022

Chestny Znak

Product Logic Specialist

- Analyzed product incidents, bugs, API errors, and second- and third-line support scenarios.
- Contributed to technical documentation and knowledge-base updates for the product marking system.
- Detected systemic product issues and improved internal CRM processes based on user requests.

KEY ACHIEVEMENTS

- Designed and launched 9 automation products and services.
- One product was recognized as the company's best product solution in 2025.
- Selected by Rostelecom for IT Camp 2025 at Sirius University, designing a solution for Gazprom Neft.
- Among the first to adopt and implement Jaga during the company's import-substitution transition.

EDUCATION

2025 / Sirius Science and Technology University - advanced IT technologies and practical methods for solving business tasks.

2021 / Povolzhskiy State University of Telecommunications and Informatics - higher education, computer engineering.

2017 / Samara Aviation Technical College at Samara University - computer network and automated systems technician.

SKILLS

Product Design	UI/UX Design	UX Research	Design Systems
Information Architecture	User Flow	CJM	JTBD
Usability Testing	Prototyping	Interaction Design	Product Discovery
Hypothesis Testing	Stakeholder Management	Design Review	B2B Product Design
AI Products	AI UX Patterns	Project Management	Figma
