Portfolio: [ostaev.vercel.app](https://ostaev.vercel.app)

## PROFESSIONAL SUMMARY

AI Product Designer and Product Manager with 7+ years of experience delivering automation, B2B, and AI-powered products. Combines product strategy, systems analysis, UX/UI design, and prompt engineering to turn complex business requirements into usable solutions. Experienced in product discovery, rapid prototyping, AI search and knowledge-base experiences, dashboards, admin panels, and operational workflow automation. Known for improving efficiency, reducing support workload, accelerating information retrieval, and leading cross-functional teams from concept to implementation.

## CORE SKILLS

AI Product Design, Product Management, Product Discovery, Prompt Engineering, UX/UI Design, UX Research, B2B Product Design, AI Search, Information Architecture, User Flows, JTBD, CJM, Usability Testing, Design Systems, Complex Interface Design, Dashboards, Admin Panels, Automation Workflows, Hypothesis Testing, A/B Testing, Stakeholder Management, Agile/Scrum, Team Leadership, Figma, Adobe Illustrator, Python

## SELECTED IMPACT

- Delivered 9 automation products and services, including AI solutions, reducing workload for support and analyst teams by 1.5x.
- Improved information retrieval speed in the corporate knowledge base by 2x through UX redesign, information architecture improvements, and AI interaction scenarios.
- Led and coordinated a team of 5 specialists, running design reviews and ensuring smooth handoff to development.
- Used AI and prompt-based workflows to accelerate product discovery, interface design, hypothesis validation, and prototype creation.
- Contributed to a product recognized internally as “Best Product Solution” in 2025 and was selected for IT Camp 2025 at Sirius University, reaching the semifinal with a team solution for Gazprom Neft.

## PROFESSIONAL EXPERIENCE

### Rostelecom Information Technologies | Automation Lead (AI Product Designer) | May 2023 - Present

Design and deliver AI-driven internal products and automation solutions for enterprise users.

- Designed AI products and automation systems, including AI search, dashboards, admin panels, statistics tools, and user-management interfaces.
- Created and optimized structured prompts for rapid prototyping, UI concept generation, user scenarios, screen structures, and interactive prototypes.
- Applied LLMs and AI tools to product discovery, UX research, requirements analysis, and hypothesis generation for complex B2B products.
- Defined AI functionality requirements and collaborated with ML engineers, developers, and analysts during implementation.
- Designed AI interaction flows, including request scenarios, context structure, model-response handling, and error states.
- Ran experiments, evaluated AI output quality, and improved solutions based on user feedback and business constraints.
- Coordinated a team of 5 specialists, conducted design reviews, and supervised delivery to development.
- Built and launched 9 automation products and services, including AI solutions, reducing operational workload by 1.5x.
- Improved corporate knowledge-base search speed by 2x through UX, information architecture, and AI-scenario redesign.

### X5 Tech | Project Launch Manager | Jan 2022 - Jun 2023

Supported internal service operations and cross-functional collaboration between business users and IT teams.

- Worked with internal IT systems and business users, processing requests from adjacent departments and business partners.
- Identified issues in service interfaces and operational processes and collaborated with technical teams to resolve incidents.
- Mentored junior specialists and participated in onboarding and training activities.
- Contributed to documenting user scenarios for internal services.
- Maintained request-processing speed and throughput 12% above the department average.
- Highlighted key support-service issues, improving collaboration quality between departments.

### Chestny ZNAK | Product Logic Specialist | Apr 2019 - Jan 2022

Worked on product support, incident analysis, product logic, and knowledge-base improvements for product-marking workflows.

- Analyzed product incidents, including bugs, API errors, and second-/third-line support scenarios.

- Contributed to technical documentation and the product knowledge base.
- Advised users on product scenarios and system logic.
- Identified recurring system errors and bottlenecks through support-request analysis and helped optimize CRM processes and user scenarios.
- Recognized as the top employee on the shift schedule for high-quality incident analysis (September 2021).
- Maintained a consistently high level of accuracy in identifying and classifying product issues.

## EDUCATION

**Volga State University of Telecommunications and Informatics** | 2021

Information and Computer Engineering (part-time program)

**Samara Aviation College, Samara National Research University named after S.P. Korolev** | 2017

Computer Network Technician; Computer Systems for Quality Management in Automated Production

## PROFESSIONAL DEVELOPMENT

**Sirius University of Science and Technology** | 2025

Advanced IT Technologies: key directions, advanced methods and practical skills for solving business problems

## LANGUAGES

Russian - Native | English - A2 (Elementary)
